DETAILED ACTION

Allowable Subject Matter

Claims 1, 7, 8, 11-13 and 21 are allowed.

The following is an examiner's statement of reasons for allowance:

The instant claims are to a heat-shrinkable opaque white film comprising a core layer and white back and front layers, wherein the core layer comprises carbon black as a black colorant and the amount of carbon black is 0.01 to 3 percent by weight based on the total weight of the core layer wherein each of the white front layer and the white back layer independently comprises titanium dioxide as a white colorant, and the content of titanium dioxide is 10 to 40 percent by weight of the total weight of each layer, wherein each of the front layer, the core layer, and the back layer independently is a heat-shrinkable film layer; wherein the thickness of the core layer is 5% to 30% of the total thickness of the heat-shrinkable opaque film; wherein the film has a transmission factor to light at wavelengths of 380 to 500 nm of 5% or less; wherein the heat-shrinkage percentage of the film is about 20% to about 90% when the film is immersed in hot water at 90°C for ten seconds; and wherein the W-value of the surface of the heat-shrinkable films is 75 or more.

The prior art does not teach a heat-shrinkable opaque white film having these features.

The most pertinent prior art, Hashimoto, teaches a heat shrinkable multilayer label having a core (B) surrounded by skin layers (A), where the when an opaque film

layer is required. Calcium carbonate, titanium dioxide, carbon black and blends are used in the core and skin layers (3:15-68, 4:1-20, 5:20-30) in 0.1 to 20 wt% along with resins such as polyethylene or polystyrene (5:45-68). Hashimoto does not expressly state the recited properties of transparency, transmission or W-value.

The applied prior art of record does not teach or suggest a heat-shrinkable white film according to independent claims 1 and 12 having a core layer and white back and front layers, wherein the core layer comprises carbon black in an amount of 0.01 to 3 percent by weight based on the total weight of the core layer (as in claim 1); or the core layer comprising one chromatic colorant selected from yellow, red, and brown pigments having 0.01 to 1 percent by weight based on the total weight of the core layer (claim 12) and further having a transparency and/or light transmission factor as claimed, wherein each white layers comprise titanium dioxide 10 to 40% weight based on the total weight, thickness of 5 to 30% of the total thickness, heat shrinkage percentage recitation, and a W-value recitation as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TAMRA L. AMAKWE whose telephone number is (571)272-1519. The examiner can normally be reached on Monday-Friday, 7:00-4:30 p.m., alternate Fridays.
